**EOC DISTRICT POPULATION STATISTICS
AND POVERTY INDICATORS FROM THE 1970
CENSUS AND OTHER SOURCES (EOC FORM
245-FIRST REVISION, APRIL 7, 1972)**

Attached are three pages of tables showing selected data for the EOC Districts, a San Francisco City map showing EOC District Boundaries, and an appendix describing the sources and limitations of the data shown on the tables. On this first revision there are ten general data categories: Total Population, Sex, Race, Ethnicity, Age, Type of Family and Number of Own Children under 18 years of Age, Living Arrangements, Welfare, Health, and Income. With the important exception of the income category (which is entirely from the 1960 Census) all other data categories relate to data generated in 1970. In the very near future a supplementary set (EOC Form 245A) of these same data categories will be published for four selected EOC Sub-Districts (i.e., I-D/Haight-Ashbury, II-D/Ocean View-Merced-Ingleside, IV-D/Inner Richmond, and V-D/Potrero Hill) and for the two Model (Cities) Neighborhood Areas (i.e., Mission and Bayview-Hunters Point). Similar data on the other EOC Sub-Districts is available upon special request to the MIS Unit at EOC. As additional 1970 Census or other source data is published in the important categories of education, employment characteristics, income, housing, etc., the EOC Form 245 (and 245A) will be revised and re-issued with that latest information. As we would like to establish a regular mailing list for those interested in receiving these subsequent revisions you are invited to tear off the last sheet, sign it with your name, address and zip code and return it to the letterhead address, Management Information Systems Unit. Your comments at the bottom of the sheet are also invited. Should you have any additional comments or questions please call.

APPENDIX TO EOC FORM 245 OF APRIL 7, 1972

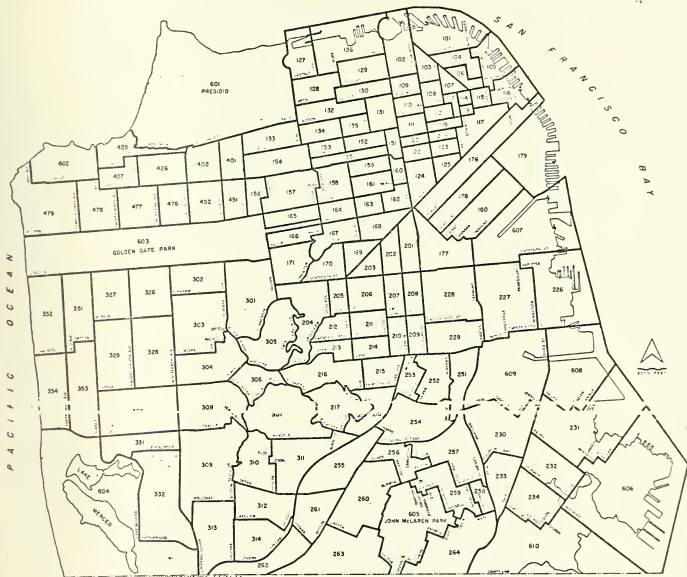

- (a.) The figure of 101,901 is a Census Bureau estimate of the total Ethnic Spanish-American population in San Francisco. It is based on the entire City population, calculated at 14% of that number, and arrived at through a preliminary analysis by the Census Bureau of its 5% and 15% samples. More exact figures will later be available on a Census tract-by-tract basis.
- (b.) The figures for the number of AFDC cases and OAS cases were obtained from a San Francisco Department of Social Services publication "Categorical Aid Case Distribution by Census Tract-January 1970". In the AFDC category the figures represent the aggregates for "FG", "U", and "MNO" sub-categories, and in the OAS category they represent the aggregate for "Cash" and "MNO" categories. Even though later case data is available for 1972, it was felt that the 1970 data utilized here would be more correlative with the 1970 Census data. It should be noted however that, especially in the AFDC Category, the welfare data is for cases not people. The ratio of adults per case varies considerably by AFDC sub-category; for the "MNO" sub-category it is currently 0.374, for "FG" 0.986, and for "U" it is 1.960. Therefore, the direct correlation of cases with persons under 21 years of age is limited. Such a limitation does not exist in the OAS Category.
- (c.) Figures for the "Births per year" and "Deaths per year of Infants Under 12 Months" were obtained from the Office of Data and Statistics of the San Francisco Department of Public Health. In both categories the figures represent data occurrences for the entire year of 1970.
- (d.) Figures for "Families with Annual Incomes Under \$4000" and the total district populations against which the "Estimated % Poor" was computed were obtained from the 1960 Census Table P-1. For the entire City the Family Population decreased from 182,027 (in 1960) to 164,436 (in 1970) for a decrease of 9.7%. The following are the percentage decreases from 1960 to 1970 in family populations by EOC Districts:
- | | |
|-----------------------|--------|
| (1.) EOC District I | -21.5% |
| (2.) EOC District II | - 7.8% |
| (3.) EOC District III | -11.5% |
| (4.) EOC District IV | + 4.6% |
| (5.) EOC District V | -18.7% |
| (6.) Remainder | - 8.0% |

These decreases do not account for any additional concentrations of "poor" families that may have occurred between 1960 and 1970. Therefore, care should be taken in the utilization of these two line-items of data. The percentages on the "estimated % poor" line represent the ratio of that area's or district's 1960 population over the entire 1960 population for the City.

- (e.) Unless otherwise specified above, all other data were obtained from the 1970 Census Table P-1 and/or first-and-second-count refinements.
